

## Iron Man Hydraulic Squeeze Tool 125mm

Designed for flow control or temporary closure of pipe sizes 63-125mm. Featuring a hydraulic pump, the Iron Man will close PE pipes of any standard wall thickness within the size range with ease.

Permanent pipe damage is prevented by correct use of buffer stop plates and when under squeeze conditions, screwing down the lock pins will prevent any loss of squeeze caused by a reduction in hydraulic pressure. Spare sets of buffer stop plates are also available for use on a range of pipe sizes.

### FEATURES

- Designed to meet standard GIS/PL2-7
- Pipe range 63-125mm Ø
- Hydraulically assisted
