

## Hydraulic Squeeze Off Tool 315mm

Designed for flow control or temporary closure of large size pipes. Generating a force of 25 tonnes the hydraulic jack will close PE pipe of any standard wall thickness within the size range.

Permanent pipe damage is prevented by correct use of the limit stops. When under squeeze conditions, screwing down the lock pins will prevent any loss of squeeze caused by a reduction in hydraulic pressure. Spare sets of limit stops are available for use on a range of pipe sizes.
