

Virax Guillotine Pipe Cutter

Virax Guillotine cutters are designed to cut through HDPE pipe up to 315mm. A hinged V shape jaw allows the cutter to be positioned anywhere on existing pipes.

The quadruple ground stainless steel blade provides an accurate square cut for Electrofusion welding and minimal facing for Butt Fusion welding. A square drive feature allows the cutter to be used with a wrench and extension when working in narrow trenches.

FEATURES

- Long life stainless steel blade
- Fast opening
- Environmentally friendly - No PE waste

| Code | Description |
|-----------|---------------------------------|
| 04-61-207 | Virax Guillotine cutter 125mm |
| 04-61-208 | Replacement blade, 125mm cutter |
