

Joint Master Positioning Clamp

The lightweight aluminium jaws holds pipe sizes 63mm-180mm without the need for reducing liners.

When coupled together with the angle maker you have the versatility of a positioning clamp to hold pipe in 45° and 90° bends.

The quick opening handle and the patented centering system allows you to install the clamp easily over the pipe until the weld process has finished.

FEATURES

- Made from lightweight aluminium and steel
- Easy to install and use
- Suitable for pipe sizes 63mm-180mm
- No reduction lines required for smaller branch outlets
- Minimal excavation required below pipe
- Available in 2 or 3 way configuration
- Patented in-line pipe centering system

Joint Master Positioning Clamp
